COVID-19 Safety Support Programme

Working with the insurance industry, Sirius Aviation can provide support during this time of crisis within the industry.

This support programme will be accomplished in three phases:

- Support businesses during the transition phase from crisis response to businesses planning to resume operations.
- Operations management of change and safety/risk management support for stabilisation of normal operations.
- Post COVID-19 review of business crisis management response and business continuity planning.

Sirius Aviation will work with your insurance broker to provide support in areas of safety and operational support in this unprecedented time of need. .

Our response to clients will include support in the areas of business continuity, risk management, safety program support and safety advisement.

SUPPORT FOR RESUMPTION OF OPERATIONS

COVID-19 has generated significant business disruption. With airline operations shut down or running on much reduced schedules with reduced management team oversight, operators are faced with new safety, operations and commercial risks. Business planning, safety and risk management are the keys to successful change.

SUPPORT PROVIDED:

Transition from Crisis Response to Business Planning to Normal Operations

- The business planning cycle will require robust plans covering flight, engineering and ground operations with effective safety and assurance oversight as they plan for the resumption of normal scheduled services. Sirius brings a depth of operational experience and can assist operators in development, management and/or evaluation of robust return to service planning processes

Operations Management of Change and Safety/Risk Management Support for Return to Scheduled Services

- Dedicated safety case development for identified risks affecting safe return to scheduled operations (hub and remote base) from reduced or grounded operations
- Supporting Risk management and Management of Change process, Safety leadership and communications program, and safety assurance program revision through dedicated support personnel

COV-19 Post hoc review of business crisis response performance and business continuity planning

- Full independent evaluation of business crisis response, stakeholder engagement and continuity planning with recommendations for continuous improvement

ORGANISATIONAL BENEFITS:

- Reduction in Incidents During Transition to Normal Operations
- Enhanced Safety Leadership and Culture
- Reduction in Frequency of Attritional Losses & Claims
- Increased Operational Integrity
- Supporting Business & Safety Performance
- Enhanced Loss Prevention
